Barr's "Gold Medal" Daffodils

**Awarded Thirty-one Gold Medals and
A Ten-Guinea Challenge Cup.**

Also many First-class Certificates and other high awards.

The Daffodils enumerated in the following pages comprise some of the finest novelties, and include besides new seedlings of our own raising, many varieties raised by the Rev. G. H. Engleheart, Mr. E. M. Crosfield, the late Rev. G. P. Haydon, Mr. J. C. Williams, Mr. P. D. Williams, Mrs. Baekhouse, Mr. Philip J. Worsley, Mr. Charles H. Cave, and Mr. Charles Dawson. We would specially draw attention to the following fine exhibition varieties: **Ariel, Bedouin, Bernardino, Bloodstone, Cæsar, Charm, Challenger, Cleopatra, Cossack, Czarina, Dione, Dresden, Empire, Faction, Florizel, Furnace, Golden Ensign, Horatius, Inglescombe, Jasper, Lewis Carrol, Lord Kitchener, Loveliness, Marie Louise, Memory, Mermaid, Michael, Michael Angelo, Miss Willmott, Moonbeam, Mrs. George H. Barr, Oakhurst, Pandora, Pedestal, Peter Barr, Red Beacon, Ruby, Seraphine, Sheba, Sirdar, Sir Galahad, Snow King, Socrates, Sunrise, St. George, The Grey Mare, Timon, Toreador, Volcano, Wildfire, and Zephyrus**, etc.—all of great beauty. We would mention that we purchased from **Mr. Charles Dawson** (who has given up growing Daffodils) his "**Rosemorran**" Daffodil Seedlings, containing many beautiful varieties. Visitors to the London and Birmingham Shows will well remember Mr. Dawson's charming exhibits.

Special Advantages Offered to Our Australian and New Zealand Customers.

In view of our customers in Australia and New Zealand having to acclimatise bulbs sent out from England, and therefore to wait longer for results than growers at home, we have made a **liberal reduction in prices**, and shall where possible send out only breeder bulbs or those with one or more offsets.

Orders should be sent as early as possible, as of some of the newest varieties we have only a few bulbs for disposal. **After the end of August any orders received will be charged at our General Catalogue Prices.**

 Our complete DAFFODIL CATALOGUE for 1913 will be ready August 1st, and our GENERAL BULB CATALOGUE for 1913 on September 1st. In the meantime we shall be very pleased to book orders from our 1912 issue.

Barr's Special Early Offer of Daffodils

Including New Seedlings.

☞ Where we have a record, we give in inches the heights as registered at our Nurseries.

The relative qualities as we judge them we have indicated by xxx, xxxx, the highest quality flower being given the most marks. The more common varieties of Daffodils we do not offer in this list, but they will be found in our General Daffodil Catalogue which is issued later on. The figures after the names indicate the relative period of flowering with us, (1) being the earliest, (5) the latest.

Johnstoni Queen of Spain (Wild Triandrus Hybrid) (4), xxx, found by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct and graceful Daffodils in cultivation and unsurpassed either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in Fertilised Fibre Shell and Charcoal mixture, or damp pebbles and gravel, and grown thus affords an artistic decoration for the sitting-room. <i>As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, there is a possibility that all the bulbs may not bloom the first season, but a fair proportion will.</i>

Little Queen , <i>new</i> 1912, raised by Mr. Herbert Chapman, a cross between <i>Triandrus Calathinus</i> and <i>Minimus</i> , and one of the daintiest of miniature Daffodils, growing only 5 inches high. The flowers, which come two on a stem, are trumpet-shaped and about the size of <i>Nanus</i> , and as in the case of <i>Triandrus pulchellus</i> have an arrangement of colour the reverse of that found in any other Daffodils, the perianth being primrose and the trumpet white; the rule is that the perianth is lighter in colour than the trumpet or cup. Recommended for pot culture in a cold frame	(only a very few bulbs)		0	18	6

Triandrus albus (3), an exquisitely beautiful little species, appropriately called the "Angel's Tears" Daffodil, found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, fine gritty soil, sometimes in the narrowest fissures of granite and slate stone rocks. It makes a lovely little pot plant (two or three bulbs in a pot) and grown thus should be given cold frame culture. Established on rockwork the Triandrus Albus forms a picture full of grace and beauty; it is of slender growth, and produces a cluster of elegant little creamy white flowers with globular cup and perianth reflexing as in the Cyclamen, ht. 7 in. <i>Strong homegrown bulbs</i> , per 100, 15/-; per doz. 2/3		0	0	3
Triandrus Calathinus (3). One of the most beautiful little Daffodils in existence. The flowers, which are snowy white, are more than twice the size of <i>Triandrus albus</i> , with long goblet-shaped crown prettily fluted, and are borne two or three on a stem; the foliage has a curious twisted habit, ht. 7 in. For pot culture and rockwork it is a perfect gem. The late Mr. Peter Barr collected this rare Daffodil some years ago on one of the Glénan Isles, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all traces of it; consequently we have to raise it from seedper doz. 21/-		0	2	0
